INSTRUCTIONS.

We have aimed to make this catalogue as complete and comprehensive as possible, to aid our out-of-town trade in making up mail orders.

The prices herein quoted are the market prices the day this list goes to press, and are subject to change without notice.

All quotations are F. O. B. (free on board cars) St. Louis, unless otherwise agreed.

OPENING AN ACCOUNT.—Those who have never had an account with us but wish to open one, and who are not rated in the commercial agencies, will please send us St. Louis or other references to insure prompt shipping. Failure to send references compels us to make inquiry regarding the responsibility of parties and delays shipping of goods until we receive satisfactory information.

TERMS.—Turpentine, Benzine, Alcohol, Gold Leaf and English Vermilion, net cash 30 days. Linseed Oil, net 30 days, 1 per cent discount 10 days. Regular goods, such as White Lead, Brushes, Mixed Paint, Colors, Tools, Supplies, etc., net 30 days, 2 per cent discount 10 days, unless otherwise arranged for.

C. O. D. SHIPMENTS.—Where goods are sent C. O. D. (collect on delivery), by express or freight, **we require a remittance equal to one-quarter the amount of the order, to accompany the order.** We ask this to guarantee the express or freight charges. No order will be sent C. O. D., either by express or freight, without this remittance. Remittances should be made by bank draft or money order, **and not by personal check.**

Goods sent by Mail are at buyer's risk. When cash purchase, a sufficient amount must be included to cover postage.

EMPTY PACKAGES.—When sending cans to be refilled they must bear tag with shipper's name thereon, and be sent by **prepaid express** and not by freight, as this necessitates our sending to the depot for them at an expense to us. We make no charge for delivering goods to the depot, but cannot be expected to pay two cartages on one order.

Railroads generally have "oil days" on which they ship oils. This frequently causes oil to reach our customers one or two days later than other goods when both have been sent to the depot together.

RESPONSIBILITY.—We are not responsible for goods after they leave our hands. If goods are received from the railroad or express company in a damaged condition, claim should at once be made on **them** and **not** on us.

Do not cut up this catalogue. It is only necessary to give the quantity, number, name and size of each article.

THE BECKER-MOORE PAINT CO.

Office of
The Becker-Moore Paint Co.

TO OUR PATRONS:

In presenting this Catalogue and Price List we wish to express our sincere thanks to the trade for the very liberal recognition accorded our efforts to supply the *best goods in our line the market affords*.

In the following pages to which we invite your careful attention, we have endeavored to convey an idea of the goods which we manufacture and carry in stock. We are in position to meet the wants of all consumers of paint materials.

Our factories are supplied with the most modern machinery and we possess every facility for producing the highest grade of goods.

Pledging ourselves to a constant effort to merit your confidence and patronage, we remain,

Yours respectfully,

THE BECKER-MOORE PAINT CO.

BEST MADE PAINT.

BEST BY EVERY TEST.

READY FOR USE.

The superiority of machine over hand-made paints is so generally conceded that it seems hardly necessary to enter into a discussion of that question at this late day.

The process followed in the manufacture of our **Best Made Paint** insures greater uniformity in color, fineness and covering capacity than it is possible to attain in a paint mixed by hand in the old way.

We claim for **Best Made Paint** that it is the most durable and economical paint in the market. It is made from the best pigments and the best colors to be obtained, and ground in **Pure Linseed Oil**, by the latest improved machinery. We offer it to the trade with perfect confidence that it will meet the requirements of the most exacting consumer and under a guarantee to give absolute satisfaction. **Guarantee and directions on each can.**

Our stock includes Inside and Outside White and Black, and thirty-five desirable shades, while our facilities are such that we can make special shades on short notice, and we will be pleased to quote prices on special shades at all times.

TRIOXIDE PAINT.

READY MIXED FOR USE.

Specially adapted to paint Barns, Roofs, Warehouses or Metallic Surfaces.

This paint possesses peculiar adhesive and elastic properties, and will not crack, peel or scale off as a result of expansion or contraction of the various surfaces to which it is applied. It will resist the action of sulphurous or carbonic gases and is suited to any climate. It can be used on wood or metal surfaces. It is the most desirable paint on the market for permanency, economy and beauty of finish.

Made in five shades.

List Prices.

KRESOTE SHINGLE STAIN.

CREOSOTE PREPARATION.

Made in eight tints: Red, Moss Green, Grass Green, Bronze Green, Slate, Brown, Yellow and Silver Gray.

Special tints made to order.

These stains besides imparting an artistic and lasting finish to shingles, greatly prolong their life by preventing the inroads of insects and arresting decay.

Wood samples and discount on application.

Prices.

	Per Gal.
Red, Brown, Slate, Yellow, bbls	\$1 00
Red, Brown, Slate, Yellow, ½-bbls., 5 and 10-gal. kits..	1 10
Red, Brown, Slate, Yellow, 1 and 3-gal. kits.....	1 20
Green Tints and Silver Gray, list advance 20c per gallon.	

The covering capacity depends upon the manner in which it is used. If brushed on, a gallon will cover 160 square feet, one coat, while 1½ gallons will cover the same surface two coats. From 2¼ to 2½ gallons is sufficient to dip 1,000 shingles, and less than a gallon more is enough for a brush coat in addition after the shingles are laid. It is not necessary or customary, in dipping shingles, to cover more than two-thirds of their length.

ALPHITE.

ROOF AND SMOKE STACK BLACK.

(Asphaltum Composition.)

BLACK ONLY

It won't crack, blister, run or scale. It is water-proof, spark-proof, rust-proof, elastic. Ready mixed. Dries with gloss.

If too thick, can be thinned with turpentine or benzine.

GRAPHITE PAINT.

LIQUID AND PASTE FORM.

Especially adapted for structural iron work, bridges, roofs, smoke stacks, boiler fronts and all surfaces subjected to sulphurous fumes and outside exposure.

We make this from absolutely pure flake graphite, which when ground in pure linseed oil forms an elastic coating to iron and steel that will absolutely prevent rust and corrosion.

These goods are furnished in the Natural Graphite (dark gray color), also in black, dark green, and dark red, in the following size packages.

List Prices.

HOLLAND LEAD WHITE.

THE MASTER PAINTER'S FAVORITE.

THE BEST WHITE.

We are not in any combination, and our price is based upon a small margin over cost. This lead will not chalk, scale or peel off. It covers better and will wear longer than any lead on the market.

Per Lb.

100 and 250 lb. kegs, net weight.....	\$0 06 $\frac{3}{4}$
25 and 50 lb. kegs, net weight.....	07
12 $\frac{1}{2}$ lb. kegs, net weight.....	07 $\frac{1}{4}$

B. M. P. LEADED ZINC WHITE.

Our Lead and Zinc in Oil is composed of strictly pure White Lead, selected Zinc and inert materials finely ground in pure Linseed Oil. The large percentage of lead gives it body, covering capacity and durability—the zinc giving it hardness and whiteness. It brushes smooth, covers perfectly, and will not crack, flake or chalk off.

It is an established fact that Carbonate of Lead and Oxide of Zinc, combined in proper proportions, is superior to White Lead alone, and makes a more durable paint.

Per Lb.

100 and 250 lb. kegs, net weight.....	\$0 06 $\frac{1}{4}$

NON-CORROSIVE BAUXITE WHITE.

GROUND IN PURE LINSEED OIL.
THE WORLD'S BEST PRIMER.

Bauxite is the most durable white pigment for priming or under coats. It penetrates deeply into the pores of the wood, producing a hard, lasting surface, undergoing no chemical action, which renders it absolutely impervious to atmospheric changes. Bauxite White retains the oil, forming a paint fabric, and should not be applied on any surface containing moisture of any kind, otherwise the paint will peel or chalk off when the sun draws the moisture to the surface. To insure a durable job, when white lead is used for finishing coats, mix with equal parts of Bauxite.

SECURITY COLD WATER PAINT.

INTERIOR AND EXTERIOR.

Furnished in White and colors, and is fire-proof, sanitary, washable and durable. It is ready for use by the addition of cold water. Guaranteed not to rub off, scale, or wash off, is specially prepared for painting the exterior and interior of Factories, Breweries, Warehouses, Stables, Public Buildings, or Residences, and will greatly increase light in shafts and courtyards of large buildings, can be applied on wood, plaster, brick, stone, or any solid surface.

DIRECTIONS FOR MIXING.—Add one measure of cold water to two measures of dry powder; stir thoroughly until the mixture is smooth and free from lumps, then thin down with the addition of cold water to about the consistency of thick cream. Care should be taken not to mix the paint too thin.

One pound of Security Cold Water Paint will cover on

MACHINERY PAINT.

A composition in paste form for filling and painting all classes of iron work. Will make the roughest castings smooth.

When used as a filler, take the Iron Filler as it comes in the package, and with a putty knife coat all the rough or imperfect surfaces. After standing for two to four hours, the surface will be ready for the finishing coat, which can be prepared by thinning the Iron Filler with either turpentine or benzine, if a flat finish is desired. When a glossy finish is wanted, thin with equal parts boiled oil and turpentine or benzine.

The binding and drying qualities are ground with the pigment so that Japan is not necessary.

PUMICE STONE BRICKS.

For Rubbing Paint and Varnish.

This artificial pumice stone is made in four forms of granulation, and each of these in two or three degrees of hardness as follows:

No. 1. I —Coarse in grain, soft....	} For planing wood, removing paint, varnish, etc.
No. 1. II —Coarse in grain, hard....	
No. 2. I —Finer, soft	} For preparing ground work for varnishing.
No. 2. II —Finer, hard.....	
No. 3. I —Superfine, soft.....	} For fine polishing of wood, metal, stone, etc.
No. 3. II —Superfine, medium.....	
No. 3. III—Superfine, hard.....	

	Per Doz.	Each
Blocks weighing about $1\frac{3}{4}$ pounds	\$1 50	\$0 15

EUREKA RUBBING STONE.

Will save the "car and carriage painter" fifty per cent in rubbing down rough stuff. It is an entirely new product, will neither scratch nor clog, and cuts much more rapidly than pumice or any other of the rubbing stones. It is prepared in blocks of one pound each, packed in cases holding 25, 50 and 100 blocks.

In Cases..... Per Dozen, \$1 50 Each, \$0 15

SICHEL GLUE.

AN EXTRA STRONG BINDER.

Dissolves in Cold Water.

A great saving of time is effected and no loss sustained through burnt pots, etc. Does not require to be previously soaked or steeped. Absolutely non-odorous and will neither putrify nor deteriorate in any way, no matter how long kept, even in very hot or very cold weather.

The material dries out rapidly and smoothly, showing no brush marks, although not all worked in the same direction; even after a long stoppage of work, the point of recommencement does not show. The colors show up purer and absolutely spotless.

DIRECTIONS FOR USE.

Add a very little water (hot or cold) to the glue, say one part water to ten parts glue, stir thoroughly with a stick until intimately mixed, then add a little more water and stir, and continue this process until sufficiently reduced.

For Plain or Ground Work the proportion should be: Five parts water to two parts glue, that is, one quart water to one pound glue.

The Whiting, etc., should be mixed up with cold water into pulp free from lumps, then thoroughly stir in the dissolved glue according to the strength of binding required.

For Finest Work the best proportion is: One pound Glue (undissolved) to seven pounds Dry Color or Whiting.

In cans, 5 and 10 lbs.....Per Lb., \$0 12

Write for Descriptive Circular.

IMPROVED PREPARED PASTE FOR PAPER HANGERS.

Barrels, per package.....\$2 00
 ½-bbls., per package.....1 25

WEBB COLD WATER DRY PASTE.

It's a great "sticker" and will be found more convenient and economical than any paste ever put on the market.

It absorbs from four to seven times its own volume of water, that is one pail full of paste will take between four and seven pails full of water, making from five to eight pails full of ready-for-use paste.

The best results are obtained by adding the dry powder in small quantities to the water, with constant stirring, which will instantly result in a very smooth paste ready for use, and perfectly free from lumps. It is adapted to all kind of paper, and is also suitable for steam fitters use in covering asbestos installations. It keeps perfectly, does not deteriorate, and is most convenient, and at relatively less cost than any other paste.

Try a Package. We guarantee it will please you.

DIRECTIONS FOR TESTING THE PURITY OF RAW LINSEED OIL.

Take a test tube, or a long two-oz. bottle; pour in equal parts of raw Linseed Oil to be tested and common Nitric Acid (say one-half oz. of each). Shake the mixture well and let it stand for twenty (20) minutes. If the oil is pure, the upper strata will be a straw color, and the lower strata colorless. Even five per cent adulteration will change the upper strata to dark brown or black, and the lower strata to bright orange or dark yellow, according to the material used as an adulterant. The market is flooded with adulterated oil.

FRESCO STENCILS.

We carry by far the largest and most complete line of Stencils in the country, comprising Borders from 3 to 48 inches wide, Corners, Breaks, Rosettes and Centers, and ranging in price from 15 cents to \$1.25. These are cut in specially prepared paper (not the old-fashioned oiled paper) and they will remain soft and pliable for years; in fact we guarantee them. We issue an eighteen-page illustrated catalogue showing miniature reproductions of the stencils themselves, and will mail same on application. Stencils can be mailed safely on cardboard rollers.

STENCIL ASSORTMENT.

Heretofore it has been a very difficult matter for a dealer to carry stencils in stock on account of the great variety and no convenient place to carry them and keep them clean. To overcome this objection we offer our

Trade Assortment No. 1.

This assortment contains 41 Stencils. They are all new designs, up-to-date and practical. They are arranged in the cabinet (see cut) so as to get at readily. Each one is numbered and as fast as one is sold or taken out it can be replaced at once by mail at 50% discount from the list.

The list value of this assortment is \$40.76. We are making a special offer to the trade on this assortment; costs but \$15.00 net. If you use or sell stencils it will pay you to write for this "special offer." With each assortment we supply one hundred catalogues free, with space left at the bottom, on which to stamp your name and address. Send for catalogue and price of Stencil Assortment No. 1.

SECURITY WOOD FILLER.

LIGHT AND DARK.

PASTE FORM.

This filler is prepared from materials which years of practical experience and careful study have proved to be the best surfacers that can be used. It fills the pores of the wood perfectly, dries easily and leaves the work in proper condition for finishing.

After the wood is properly surfaced, thin with turpentine or benzine enough of the filler for immediate use. Apply with a bristle brush as you would a coat of lead. When the filler has set, wipe off, rubbing across the grain all that will not rub into the grain, and let stand from eight to twelve hours before applying varnish or finishing coat.

SECURITY

LIQUID WOOD FILLER

OR SHELLAC SUBSTITUTE.

Superior to Shellac and First-coating Varnishes.

Adapted for use on Pine, Poplar, Cherry, Maple and all close-grained woods. Also for open-grained wood which has been filled with paste filler. Covers more surface than shellac; costs much less and requires no sandpapering or rubbing off. It penetrates the wood or other surface to a proper depth, closes the pores, and absolutely prevents suction, absorption or sinking in of the varnish or other outer coat. It is perfectly transparent and will not discolor the lightest wood.

WHITEWASHING MACHINE.

Whitewashing Machine.

This device is a complete whitewashing and spraying machine, easily operated, built compactly, and a perfect success in its practical operation. Two men with this machine can do the work of twenty men with brushes. The machine is provided with an iron base plate for the purpose of fastening rigidly to board or plank. The suction hose is placed in a barrel or bucket in which the mixture may be prepared. This machine will do a better job than the brush, as it applies the material evenly and forces it into crevices that the brush cannot reach. It is just as easy to spray into recesses as

on flat surfaces, and no harder on a brick wall than a wooden one. The outfit consists of whitewashing machine complete, equipped with pressure gauge, pump, suction hose, spraying hose, one nozzle and galvanized iron sieve.

	Each
Style D, complete	\$25 00
Style C, complete	31 00
Style B, complete	38 00

SPRAYING MACHINE.

Style H
Spraying Machine.

A five-gallon, heavy galvanized iron tank, with self-contained improved spraying pump. All the essential parts that come in contact with the fluids are made of bronze that will not corrode or rust. This outfit can be operated by one man, and is very desirable for disinfecting and whitewashing chicken coops, spraying flowers, vegetables and shrubbery of all descriptions, and for general work around a farm or garden. The outfit consists of a five-gallon tank, ten feet of rubber discharge hose, and spraying nozzle.

Price, complete.....\$9 60

PAINTER'S COMBINATION HEATER. FOR GASOLINE.

**SIMPLE AND DURABLE
FOR HEATING WATER OR A ROOM.**

The Combination Heater has been made to fill a long-felt want. It will heat a pail of water in five minutes, or a good-sized room in ten minutes. The flame is very powerful. It may also be used for heating soldering irons or melting lead, glue, etc., and is absolutely free from smoke or smell, which is common when using an oil stove. The capacity is one gallon, and the cost of running is about one cent per hour. We guarantee perfect results in using this heater, and it will prove a true friend to the painter. All parts are interchangeable and easy of access for cleaning. The illustration gives an idea of the simplicity. The heater consists of one heating cylinder and heater. Any tin or galvanized pail can be used for heating water, glue, etc. This heater is indispensable for painters when working in vacant buildings during cold weather. Full instructions go with each heater. Use 74-degree gasoline. Price, each.....\$5 00

No. 120.

PAINT BURNERS.

No. 29

The best-known torches on the market are our C. and L. Blow Torches for gasoline. For burning off paint, thawing pipes, heating joints, etc. Generating about 1500 degrees F. from a solid blue flame which is easily regulated to suit the requirements of all. Tanks made of seamless brass, 18 gauge. All quart tanks have concave steel bottom, which serves as a funnel when filling. All parts interchangeable.

THE MILLER LADDERS.

Used as Painters' Trestles. Very light but strong and serviceable in Papering and Calcimining. Superior to any other ladder used. Those who have tried them will have no other.

This is what all painters say who have used them. Made especially for the mechanical trade. The Standards clasp the sides and fold closely, and in this manner avoid the danger of breaking in handling.

LADDERS—Continued.**UDELL'S PATENT EXTENSION
LADDERS.**

Strong, simple, durable. Made with improved iron rollers, cross-bar attachment, best in market. (See Cut).

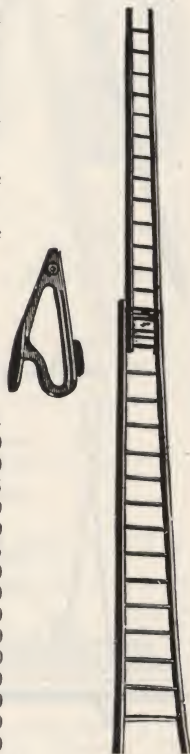

One man can raise the ladder without difficulty. It is made of clear Norway Pine, with Hickory rungs, safety cross-bar of Wrought Iron.

Self-acting gravity hooks of the best malleable iron, by means of which the ladder can be adjusted at any desired height. The most reliable extension ladder in the market.

All extension ladders are sold running measure. So, when ordering, allow about two feet for lap. We carry in stock all above lengths. Longer sizes furnished when desired. Ladders more than forty feet long are made in three sections only.

ATLAS LADDERS

Are not made longer than forty feet. List same as Udell's.

UDELL'S PATENT PAINTERS' TRESTLES.

Made of selected Norway Pine, fastened together with large two-inch screws, same as our Extension and long ladders, and with the best hickory rungs. These trestles are fastened together at top with our improved malleable iron hinge, which makes the strongest trestle in the market. The cut represents one-half set.

ROPE AND BLOCKS.

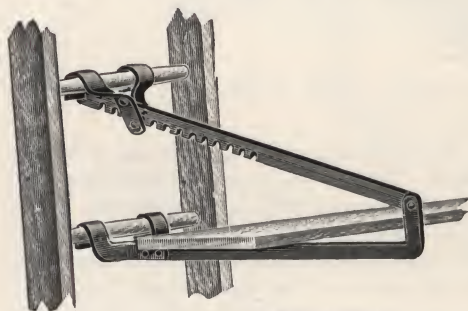

6-inch Stage, Single Iron Strapped Blocks	Each, \$0 75
6-inch Stage, Double Iron Strapped Blocks.....	" 1 00
Top Iron Roof Hooks, hand forged.....	Per Pair, 6 00
Best Manila Rope, $\frac{3}{4}$ -inch.....	Per lb., Market.
Guy Line, $\frac{3}{8}$ -inch.....	" "

To ascertain amount of rope wanted, first decide on the "fall." If 30 feet, it will take four times the length of the "fall," or 120 feet for each end of the scaffold, a total of 240 feet. $\frac{3}{4}$ -inch rope weighs about 5 feet to the pound.

All the above are the very best quality. No painter can afford to use cheap scaffolding at the risk of men's lives.

WROUGHT IRON LADDER BRACKETS.

Patent pending.

Are made of wrought iron, have a double hook which divides the strain and holds the jack firm. They are light, strong and easily adjusted, and make a firm scaffold. We do not paint or Japan these jacks, therefore no flaws or imperfections are covered up.

Price, per pair.....Net, \$3 00

PAPER HANGERS' TRESTLES.

Every Ridgely Trestle has "back-bone." It neither trembles, tilts nor topples. No better Trestle can be made and no Trestle sells better.

Made of selected seasoned maple. Best grade of nickel-plated trimmings.

Has disappearing bracket arms for holding straightedge. (No extra charge.)

Adjustable to heights from 30 in. to 34½ in.

Has no pins to manipulate.

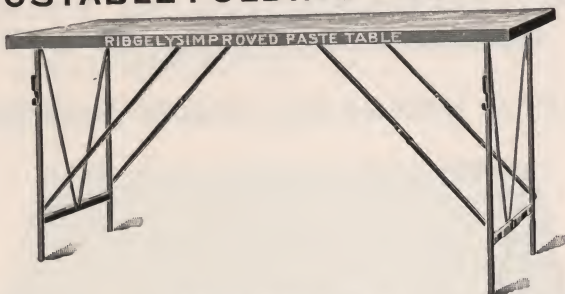

The top is always perfectly level.

Simple construction and very strong.

Folds down to the actual bulk of the wood. Pair weighs, 4½ lbs.

No. 2.	Per dozen pair.....	\$13.50
No. 2.	Per pair	1.25

ADJUSTABLE FOLDING PASTE TABLE.

Set up ready for use.

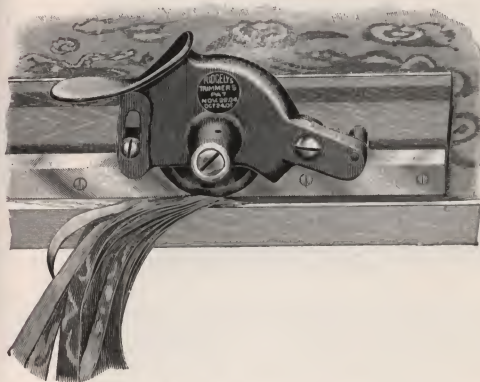

Made of absolutely clear and thoroughly air-seasoned white wood. Just steel enough (end braces) to make it far more substantial and 30 per cent lighter than all steel legs and braces. It will adjust itself rigidly to an uneven floor; while all steel, having each part firmly riveted with iron rivets, will always sit with at least one leg off the floor.

The top is made of several pieces with grain reversed, tongued and grooved, and glued. This construction—using several pieces—prevents warping and dishing, as is invariably the case where one board 11 inches wide is used.

It folds up intact without hook or button to manipulate. Straightedge hooks riveted to the legs, as per cut. Space inside for straightedge and other tools. Front or cutting side has extra heavy supporting rail, which allows but very little give in cutting the heaviest materials.

	Table Only.	Table with Extension Board.
6-foot Table, as per above, each.....	\$3.00	\$3.75
7 " " " " "	3.25	4.00
8 " " " " "	3.50	4.25

RIDGELY'S IMPROVED TRIMMER.

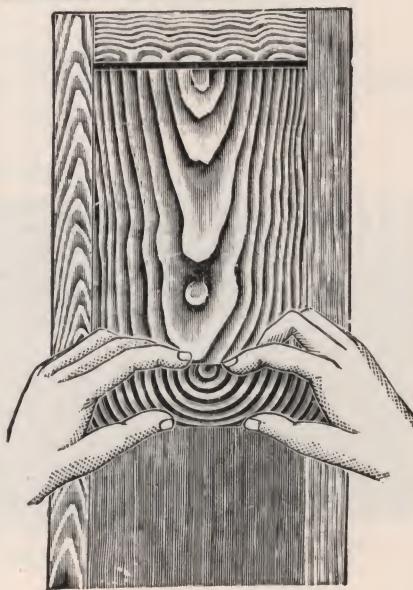

Showing the cutting capacity of the new frictionless Model D.

Will cut heavier goods with less weight than any trimmer made. It is the easiest handled; is more compact, stronger and less complicated than any other trimmer. The trimmers are nickel-plated; the straightedge is made of the best seasoned lumber and brass bound on both edges, the front edge having an angle brass, protecting the edge from warping both ways. This straightedge is ruled and alone is well worth the price of the entire outfit.

RUBBER GRAINING ROLLERS.

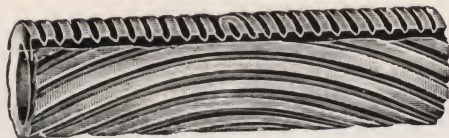

The Union Warranted Graining Rollers are made of the best selected pliable rubber, $5\frac{1}{2}$ inches long by $1\frac{1}{2}$ inches in diameter. They are used with color and oil to produce imitations of wood growths rapidly. By variation of pressure, speed, and direction of rotation, all kinds of growths can be imitated; so simple that a child can operate them and very little practice required to produce excellent results.

RUBBER GRAINING ROLLERS—Continued.

The Heart Roller, as shown in the above cut, is used to produce heart grains as found in different woods.

The Corrugated Roller, as shown in the above cut, is used to produce large effects, such as walnut and mahogany.

The Raised Straight Cut Roller, as shown in the above cut, is used to produce quarter-sawed effects perfectly.

These rollers are packed in boxes containing three rollers.

Full directions with each box.

No. 177. In sets of three rollers, assorted.

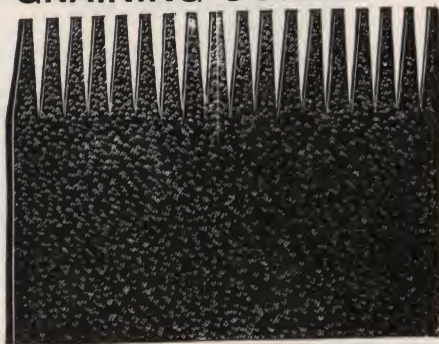

Per set.....\$1.00 Single roller..... \$0 50

STEEL GRAINING COMBS.

IMPROVED KALSOMINE STRAINERS.

No. 90. Especially adapted for kalsomine. These strainers will be found very convenient, as any thin gauze cloth can be used and replaced, as shown in the illustration. Made of heavy tin, well finished, with separate ring bottom.

Width, inches	10	
Per dozen	\$7	50
Each	75	

IMPROVED PAINT STRAINERS.

No. 91. These strainers are made extra deep, so that the paint will not spill in stirring, which is a feature no other strainer possesses. Brass wire cloth bottom.

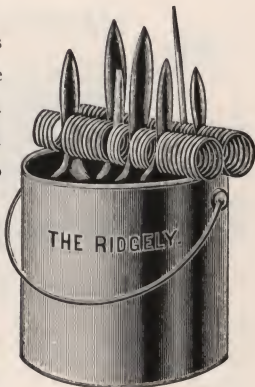

Width, inches	10	12	
Per dozen	\$8	50	\$11 00
Each	75		1 00

THE "PRACTICAL" PAINT BRUSH SUSPENDER.

The frame is made in two sizes, and is detachable, simply resting across the edge of the bucket, and, of course, can be removed when not in use. The spring coils will hold the handle of any ordinary paint brush, no matter what its size or shape. The suspender is made of the best steel and will last a lifetime. Painters who use it save both time and money.

	Per Doz.	Each.
No. 1. 9 inches in length.	\$2 50	\$0 25
No. 2. 18 inches in length	3 00	35

WHEELER'S PRACTICAL BRUSH PRESERVER.

Price, each\$2 00

This article should have a place in every paint shop. It is made of galvanized iron, Japanned black, and contains three oil-tight compartments, in which may be put three different liquids, viz.,

water, oil and varnish. A wire running across the top of each compartment is bent into eighteen scallops, or six scallops to each compartment. The handles are held tight in these scallops, making a separate place for each brush, thus doing away with the boring of holes in the handles. By the use of this device brushes may be kept in excel-

lent condition, and with reasonable care the brush keeper will last a lifetime.

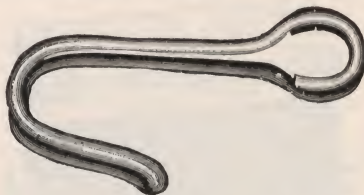

IMPROVED PAINT POTS.

No. 93. Made of galvanized iron; capacity, four and five quarts. Handles securely set on.

Capacity	4 qts.	5 qts.
Per dozen	\$2 75	\$3 00
Each	25	30

No. 95. Same as the above, made in block tin.

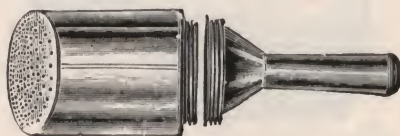

Capacity	3 qts.	5 qts.
Per dozen	\$2 00	\$2 50
Each	20	25

POT HOOKS.

No. 99. The Duplex Pot Hook is made of bright steel wire. Cannot unhook from the pail and fall into the color; easily moved on the rungs of ladder.

Per dozen\$0 50 Each..... \$0 05

Packed three dozen in a box.

IMPROVED PAINTERS' SANDERS.

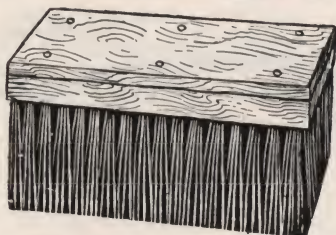

No. 92. Made of heavy tin with large screw ring handle. Impossible to break.

Per dozen..... \$7 00
Each 75

AUTOMATIC SAND BELLOWS

BRUSHES

OUR STOCK IS COMPLETE
AND OUR LINE EMBRACES
THE MOST RELIABLE GOODS
FOR PRACTICAL PURPOSES

**For the Care of Brushes the following may
be of use to those who sell or use them:**

Brushes should never be kept in a warm or dry place, as the best made Brushes are liable to shrink and come apart. For the same reason, Paint or Varnish Brushes should never be used as dusters, nor used dry. If from any cause Brushes have shrunk, they can generally be restored by putting them for a short time in a cellar or moderately damp place.

Brushes should never be used in newly slacked lime, as it destroys the bristles. We have seen the best all-bristle Whitewash Brushes spoiled in this way and declared to be not all bristles.

Paint, Varnish, Wall and Whitewash Brushes should be soaked in cold water a short time before they are used. Don't put the bristles into water, but open the Brush or bristles in the center, and turn water on the head, or handle, and let it stand with the bristle part up till the water has soaked into the head of the Brush.
